

From The President

This is my first year as president of the Northeast Indiana Chapter. I've been on the Board of Directors for NEIC PMI for many years and have always worked with getting speakers for our evening programs. I'm pleased to have passed that onto Pat Ruger as our new V.P. of Programs. For the past year Pat has helped me with getting speakers setup. This year she will have help from Dale Vollenweider. They have given us a very successful January program and have a February program setup that looks to be very interesting. I'm sure the rest of 2005 will prove to be just as good. Please check our website for the latest information on our upcoming programs. It can be found at <http://www.pmi-neic.org/chapter/program/programs.shtml>.

You will see one thing that is different for 2005 and that is the night that we are meeting. We have changed it from Tuesday nights to Wednesday nights. We know that no matter which night we pick, it will never be convenient for everyone. We are hoping that Wednesday nights will prove to be a good night for most people in 2005. We had a nice turnout for January so it must be good for quite a few people. We are still at Don Hall's Guesthouse on Washington Center Road. They have served us delicious meals for many years and we will have most of our meetings there this year. We did try one thing different last year with our programs. We ate at Don Hall's Gas House downtown and then went to another location for our program. We will be trying that in 2005 with our May meeting. We don't have the logistics worked out yet, but last year that venue proved to be a nice change for everyone. You can get all of our 2005 program dates from the URL listed above. Please mark the dates on your calendars. Look for our flyers and newsletters to give you all of the details on our programs and the latest information we have to share with our membership.

If you have any suggestions, comments or concerns with NEIC PMI, please feel free to share those with me at president@pmi-neic.org.
